## POSITIONS HELD

## University of Illinois

J. L. Doob Research Assistant Professor/NSF Postdoctoral Fellow Fall 2008-Spring 2011

## Institute for Advanced Study

Member of the School of Mathematics Fall 2009

## Dartmouth College

Visiting Research Scholar Spring 2010
University of British Columbia/Simon Fraser University
Postdoctoral Fellow
July 2011-April 2012
University of Georgia
Assistant Professor
Fall 2012-Summer 2016
Associate Professor Fall 2016-Summer 2017; with tenure, Fall 2017-Summer 2020
Professor
Fall 2020-

## EDUCATION

## University of Georgia

Bachelor of Science, Mathematics Spring 2003
Princeton University
Fall 2003 - Winter 2005

## Dartmouth College

Master of Arts, Mathematics June 2007
Ph.D., Mathematics June 2008
Thesis: Prime polynomials over finite fields

## HONORS AND AWARDS

## Russell Award for Excellence in Undergraduate Teaching

University-wide award recognizing excellence in undergraduate instruction by faculty members in their early academic careers.
NSF Algebra and Number Theory Award DMS-2001581
2020-2023
Statistical Questions in Number Theory and Arithmetic Geometry (award amount $\$ 168,000$ )
Honorific member of the Carrera Nacional de Investigadores en Ciencia 2019-
The Carrera Nacional de Investigadores en Ciencia, of the Dominican Republic, is a government initiative with the goal of drawing attention to those who have dedicated their life to research in science, technology, and innovation.

[^0]Sandy Beaver Excellence in Teaching Award
2018
Award given each year to honor UGA Franklin College faculty members showing "sustained commitment to high-quality instruction".

NSF Algebra and Number Theory Award DMS-1402268
2014-2019
Statistical problems in elementary, analytic, and algebraic number theory (award amount \$130,925)
NSF Algebra and Number Theory Award DMS-1502336
(co-PI w/ L. Thompson, R. Rumely, and G. Yu)
Summer 2015
Conference grant for "Elementary, analytic, and algorithmic number theory: Research inspired by the mathematics of Carl Pomerance" (award amount $\$ 19,728$ )

NSA Conference Award
(co-PI w/ L. Thompson, R. Rumely, and G. Yu)
Summer 2015
"Carl Pomerance 70th birthday conference" (award amount \$15,788)

## RECENT INVITED ADDRESSES

2017 National Joint Meetings of the AMS and MAA; AMS special session on "Discrete Structures in Number Theory"

January 5, 2017
'Torsion subgroups of CM elliptic curves'
MSRI workshop on "Recent developments in Analytic Number Theory" May 5, 2017
'Arithmetic functions: something old, something new'
XII International Congress of Scientific Research, Dominican Republic June 8, 2017
'Arithmetic functions: something old, something new'
60th Anniversary Ross Mathematics Program reunion conference June 18, 2017
'Summing divisors: a status report on the first 2000 years'
Invited address at Spring 2018 KYMAA meeting
April 6, 2018
'Summing divisors: a status report on the first 2000 years'
Plenary talk, 2018 INTEGERS conference
Oct 3, 2018
'Squares $\bmod p$ '
2019 National Joint Meetings of the AMS and MAA; AMS special session on "Analytic Number Theory"

January 18, 2019
'Some algebraic contributions to Waring's problem'
2019 National Joint Meetings of the AMS and MAA; AMS special session on "Counting Methods in Number Theory"

January 18, 2019
'Popular values and popular subsets of Euler's $\varphi$-function'
Max Planck Number Theory Seminar
November 13, 2019
'The popularity of values of Euler's function'
2019 Winter Meeting of the Canadian Mathematical Society
December 9, 2019
'Popular values and popular subsets of Euler's $\varphi$-function'
2020 AMS Fall Southeastern Sectional Meeting; special session on "Coding Theory,
Cryptography, and Number Theory"
October 2020
'Thoughts on the order of $a \bmod p$ '
Luxembourg Number Theory Seminar
October 2020
'Thoughts on the order of $a \bmod p$ '
'Multiplicative orders $\bmod p$ '
Nancy-Metz Number Theory Seminar
April 2021
'Multiplicative orders $\bmod p$ '
Combinatorial and Additive Number Theory (CANT) 2021
May 2021
'Multiplicative orders mod $p$ '
Combinatorial and Additive Number Theory (CANT) 2022
May 2022
'Eqdistribution and weak equidistribution for some arithmetic functions'

## ACCEPTED PAPERS

1. An explicit approach to Hypothesis $\mathbf{H}$ for polynomials over a finite field
The anatomy of integers. Proceedings of a conference on the anatomy of integers, Montreal, March 13th-17th, 2006. Editors: J.M. de Koninck, A. Granville and F. Luca, pp. 259-273
2. On a conjecture of Beard, O'Connell and West concerning perfect polynomials 2008 (joint with L. Gallardo and O. Rahavandrainy)
Finite Fields and their Applications 14, 242-249
3. A polynomial analogue of the twin prime conjecture 2008

Proc. Amer. Math. Soc. 136, 3775-3784
4. Simultaneous prime specializations of polynomials over finite fields 2008

Proc. London Math. Soc. 97, 545-567
5. Arithmetic properties of polynomial specializations over finite fields 2009

Acta Arith. 136, 57-79
6. On the distribution of sociable numbers (w/ M. Kobayashi and C. Pomerance) 2009
J. Number Theory 129, 1990-2009
7. A remark on sociable numbers of odd order 2010
J. Number Theory 130, 1732-1736
8. Revisiting Gauss's analogue of the prime number theorem
for polynomials over a finite field

Finite Fields and their Applications 16, 290-299
9. Hypothesis H and an impossibility theorem of Ram Murty 2010

Rend. Sem. Mat. Univ. Pol. Torino 68, 183-197
10. Multiperfect numbers with identical digits (joint with F. Luca)

2011
J. Number Theory 131, 260-284
11. On polynomial rings with a Goldbach property 2011
Amer. Math. Monthly 118, 71-77
12. On Dickson's theorem concerning odd perfect numbers
Amer. Math. Monthly 118, 161-164
13. Long gaps between deficient numbers 2011

Acta Arith. 146, 33-42
14. On Hilbert's solution of Waring's problem

2011
Cent. Eur. J. Math. 9, 294-301

Colloq. Math. 122, 103-123
16. Values of the Euler and Carmichael functions which are sums of three squares 2011 Integers 11, article A13, 16 pages (electronic)
17. On some friends of the sociable numbers 2011 Monatsh. Math. 162, 321-327
18. The greatest common divisor of a number and its sum of divisors Michigan Math. J. 60, 199-214
19. Perfect numbers with identical digits 2011
Integers 11A. Proceedings of the Integers Conference 2009. Article 18, 11 pages (electronic)
20. Quasi-amicable numbers are rare
J. Integer Sequences 14, article 11.5.2, 13 pages (electronic)
21. The exceptional set in the polynomial Goldbach problem

Int. J. Number Theory 7, 579-591
22. The Möbius transform and the infinitude of primes 2011
Elem. Math. 66, 118-120
23. Remarks on a paper of Ballot and Luca concerning prime divisors of $a^{f(n)}-1$

New York J. Math 17, 553-567
24. On common values of $\phi(n)$ and $\sigma(m), \mathbf{I}$ (joint with K. Ford)

Acta Math. Hungarica 133, 251-271
25. Two remarks on iterates of Euler's totient function

Arch. Math. 97, 443-452
26. An arithmetic function arising from Carmichael's conjecture (w/ F. Luca)
J. Théor. Nombres Bordeaux 23, 697-714
27. The average least quadratic nonresidue modulo $m$ and other variations on a theme of Erdős
J. Number Theory 132, 1185-1202
28. On the parity of the number of multiplicative partitions and related problems 2012 Proc. Amer. Math. Soc. 140, 3793-3803
29. On perfect and near-perfect numbers (joint with V. Shevelev)
J. Number Theory 132, 3037-3046
30. Prime-perfect numbers (joint with C. Pomerance)

Integers $\mathbf{1 2 A}$ /special issue in memory of J. L. Selfridge, article A14, 19 pages
31. Finiteness theorems for perfect numbers and their kin American Math. Monthly 119, 670-681
32. How many primes can divide the values of a polynomial? (joint with F. Luca) Acta Arith. 156, 19-27
33. On congruences of the form $\sigma(n) \equiv a(\bmod n)$ (with A. Anavi and C. Pomerance) 2012 Int. J. Number Theory 9, 115-124
34. On common values of $\phi(n)$ and $\sigma(m)$, II (joint with K. Ford)

Algebra Number Theory 6, 1669-1696
35. The average least character nonresidue and further variations on a theme of Erdős (joint with G. Martin)2013
J. London Math. Soc. 87, 22-42
36. On the degrees of divisors of $T^{n}-1$ (joint with L. Thompson)
New York J. Math 19, 91-116
37. Irreducible polynomials with several prescribed coefficients 2013
Finite Fields and their Applications 22, 70-78
38. Practical pretenders (joint with L. Thompson)
Publ. Math. Debrecen 82, 651-667
39. Sets of monotonicity for Euler's totient function (w/ C. Pomerance and E. Treviño) 2013 Ramanujan J. 30, 379-398
40. On Mertens' theorem for Beurling primes
Canad. Math. Bull. 56, 829-843
41. On the distribution of some integers related to perfect and amicable numbers (joint with C. Pomerance) 2013
Colloq. Math. 30, 169-182
42. The smallest inert prime in a cyclic number field of prime degree
Math. Res. Lett. 20, 163-179
43. Paul Erdős and the rise of statistical thinking
in elementary number theory (joint with C. Pomerance) 2013
Erdős Centennial, L. Lovász, I. Z. Ruzsa, and V.T. Sós, eds., János Bolyai Math. Soc. and Springer-Verlag, Hungary, 2013, pp. 515-523
44. Uncertainty principles connected with the Möbius inversion formula
(with C. Sanna)

Bull. Aust. Math. Soc. 88, 460-472
45. Equidistribution $\bmod q$ of abundant and deficient numbers
Uniform Distribution Theory 9, 99-114
46. A remark on prime divisors of partition functions 2014

Int. J. Number Theory 10, 125-131
47. The error term in the count of abundant numbers (joint with M. Kobayashi) 2014

Mathematika 60, 43-65
48. The smallest prime that splits completely in an abelian number field 2014

Proc. Amer. Math. Soc. 142, 1925-1934
49. Square values of Euler's function (joint with C. Pomerance)

Bull. London Math. Soc. 46, 403-414
50. The primes that Euclid forgot (joint with E. Treviño)

Amer. Math. Monthly 121, 433-437
51. Variations on a theorem of Davenport concerning abundant numbers
(w/ E. Jennings and L. Thompson)
Bull. Aust. Math. Soc. 89, 437-450
52. Prime splitting in abelian number fields and linear combinations of Dirichlet characters

Int. J. Number Theory 10, 885-903
53. Averages of the number of points on elliptic curves (w/ G. Martin and E. Smith) 2014 Algebra Number Theory 8, 813-836
54. Bounded gaps between primes with a given primitive root 2014 Algebra Number Theory 8, 1769-1786
55. Some arithmetic properties of the sum of proper divisors and the sum of prime divisors

Illinois J. Math 58, 125-147
56. Euler and the partial sums of the prime harmonic series 2015 Elem. Math. 70, 13-20
57. Bounded gaps between primes in number fields and function fields (with A. Castillo, C. Hall, R. Lemke Oliver, and L. Thompson)

Proc. Amer. Math. Soc. 143, 2841-2856
58. An easy generalization of Euler's theorem on the series of prime reciprocals 2015 American Math. Monthly 122, 159-163
59. Some normal numbers generated by arithmetic functions (with J. Vandehey) Canad. Math. Bull. 58, 160-173
60. The truth about torsion in the CM case (with P. L. Clark) 2015 C. R. Math. Acad. Sci. Paris 353, 683-688
61. Palindromic sums of proper divisors

Integers 15A/Proceedings of the Erdős Centennial Conference, article A13 (electronic), 12 pages
62. Harmonious pairs (joint with M. Kozek, F. Luca, and C. Pomerance) Int. J. Number Theory 11, 1633-1651
63. Arithmetic functions at consecutive shifted primes (with L. Thompson)

Int. J. Number Theory 11, 1477-1498
64. The length spectra of arithmetic hyperbolic 3-manifolds and their totally geodesic surfaces (with B. Linowitz and J. S. Meyer)

New York J. Math 21, 955-972
65. Besicovitch, bisection, and the normality of $0.1491625 \ldots$ (with J. Vandehey)

2015
American Math. Monthly 122, 757-765
66. Remarks on fibers of the sum-of-divisors function
in Analytic Number Theory: In Honor of Helmut Maier's 60th Birthday, M. Rassias and C. Pomerance, eds., Springer, 305-320
67. On relatively prime amicable pairs

Mosc. J. Comb. Number Theory 5, 36-51
68. The average of the first invariant factor for reductions of

CM elliptic curves mod $p$ (with T. Freiberg)
69. Some problems of Erdős on the sum-of-divisors function
(joint with C. Pomerance)
2016
Trans. Amer. Math. Soc. Ser. B. 3, 1-26
70. A Titchmarsh divisor problem for elliptic curves

Math. Proc. Cambridge Philos. Soc. 160, 167-189
71. A remark on divisor weighted sums

2016
Ramanujan J. 40, 63-69
72. Bounded gaps between primes with a given primitive root, II (w/R. C. Baker) 2016 Forum Mathematicum 28, 675-687
73. Digitally delicate primes (w/ J. Hopper)
J. Number Theory 168, 247-256
74. The representation function for sums of three squares along arithmetic progressions

Proc. Japan Acad., Ser. A Math. Sci. 92, 96-99
75. An elemental Erdős-Kac theorem for algebraic number fields

2017
Proc. Amer. Math. Soc. 145, 971-987
76. Extremal primes for elliptic curves with complex multiplication (w/ K. James) 2017 J. Number Theory 172, 383-391
77. Anatomy of torsion in the CM case (with A. Bourdon and P. L. Clark) 2017

Math. Z. 285, 795-820
78. Bounds for the first several prime character nonresidues

Proc. Amer. Math. Soc. 145, 2815-2826
79. A simple proof of a theorem of Hajdu-Jarden-Narkiewicz

Colloq. Math. 147, 217-220
80. Two problems concerning irreducible elements in rings of integers of number fields (w/ L. Troupe)

2017
Bull. Aust. Math. Soc. 96, 44-58
81. Counting perfect polynomials (w/ U. Caner Cengiz and E. Treviño)

2017
Finite Fields and their Applications 47, 242-255
82. Clustering of linear combinations of multiplicative functions
(w/ N. Lebowitz-Lockard)
2017
J. Number Theory 180, 660-672
83. Subgroup avoidance for primes dividing the values of a polynomial

Rocky Mountain J. Math 47, 2043-2050
84. Numbers divisible by a large shifted prime and large torsion subgroups of CM elliptic curves (w/ N. McNew and C. Pomerance)

2017
Int. Math. Res. Notices 2017, 5525-5553
85. Torsion subgroups of CM elliptic curves over odd degree number fields (w/ A. Bourdon)

Int. Math. Res. Notices 2017, 4923-4961
86. Clusters of primes with square-free translates (w/ R. C. Baker)
87. Bounded gaps between primes and the length spectra of arithmetic hyperbolic 3-orbifolds (w/ B. Linowitz, D. B. McReynolds, and L. Thompson)
C. R. Math. Acad. Sci. Paris 355, 1121-1126
88. The number of atoms in a primefree atomic domain (w/ P. L. Clark and S. Gosavi) Comm. Algebra 45, 5431-5442
89. The truth about torsion in the CM case, II (w/ P. L. Clark)

Quart. J. Math. 68, 1313-1333
90. Systoles of arithmetic hyperbolic surfaces and 3-manifolds (w/ B. Linowitz, D. B. McReynolds, and L. Thompson)2017

Math. Res. Lett. 24, 1497-1522
91. Refinements of Lagrange's four-square theorem (w/ L. Goldmakher)

2018
Amer. Math. Monthly 125, 258-263
92. The least prime quadratic nonresidue in a prescribed residue class mod 4

2018
J. Number Theory 187, 403-414
93. Thue's lemma in $\mathbb{Z}[i]$ and Lagrange's four-square theorem

2018
Elem. Math. 73, 60-65
94. Divisor-sum fibers (w/C. Pomerance and L. Thompson)

2018
Mathematika 64, 330-342
95. Finding the four squares in Lagrange's theorem (w/E. Treviño)

2018
Integers 18A, article A15, 16 pages
96. Pursuing polynomial bounds on torsion (w/ P. L. Clark)

Israel J. Math. 227, 889-909
97. A remark on the number field analogue of Waring's constant $g(k)$

Math. Nachr. 291, 1893-1898
98. Waring's problem for integral quaternions

Indag. Math. 29, 1259-1269
99. Counting and effective rigidity in algebra and geometry
(joint with B. Linowitz, D. B. McReynolds, and L. Thompson)
100. Typically bounding torsion (w/ P. L. Clark and M. Milosevic) J. Number Theory 192, 150-167
101. How often is Euler's totient a perfect power?
J. Number Theory 197, 1-12
102. Dirichlet's proof of the three-square theorem: an algorithmic perspective (w/ P. Schorn)
Math. Comp. 88, 1007-1019
103. Small prime $k$ th power residues for $k=2,3,4$ : a reciprocity laws approach (w/ K. Benli)
Proc. Amer. Math. Soc. 147, 987-994
104. A note on Golomb topologies (w/ N. Lebowitz Lockard and P. L. Clark)
105. A note on the least prime that splits completely in a nonabelian Galois number field (w/ Z. Ge and M. Milinovich)
Math. Z. 292, 73-86
106. Popular subsets for Euler's $\varphi$-function

Math. Ann. 374, 253-271
107. Eigenvalues of the Laplacian on domains with fractal boundary
(w/ C. Pomerance)
2019
Horizons of Fractal Geometry and Complex Dimensions. 2016 Summer School: Fractal Geometry and Complex Dimensions. In celebration of the 60 th birthday of Michel Lapidus. R.G. Niemeyer, E.P.J. Pearse, J.A. Rock, T. Samuel, eds., AMS Contemporary Mathematics, vol. 731, 2019.
108. Symmetric primes revisited (w/ W.D. Banks and C. Pomerance)

Integers 19, article A54, 7 pages
109. Nonnegative multiplicative functions on sifted sets, and the square roots of -1 modulo shifted primes
Glasgow Math. J. 62, 187-199
110. Twists of hyperelliptic curves by integers in progressions mod $p$
(w/ D. Krumm)
Acta Arith. 192, 63-71
111. Reciprocity by resultant in $k[t]$ (w/ P.L. Clark) 2020 L'Enseignement Math. 65, 101-116
112. On ordered factorizations into distinct parts (w/ N. Lebowitz-Lockard) 2020 Proc. Amer. Math. Soc. 148, 1447-1453
113. A generalization of the Hardy-Ramanujan inequality and applications J. Number Theory 210, 171-182
114. The smallest root of a polynomial congruence

Math. Res. Lett. 27, 43-66
115. On sums of consecutive triangular numbers (w/ D. Subramaniam and E. Treviño) 2020 Integers 20A. Article A15, 10 pages (electronic)
116. Phi, primorials, and Poisson (w/ C. Pomerance) 2020

Illinois J. Math. 64, 319-330
117. Multiplicative partitions of numbers with a large squarefree divisor 2020 Ramanujan J. 53, 595-605
118. The maximal size of the $k$-fold divisor function for very large $k$ 2020
J. Ramanujan Math. Soc. 25, 341-345
119. The reciprocal sum of divisors of Mersenne numbers (w/ Z. Engberg) 2021
Acta Arith. 197, 421-440
120. Finite sets containing near-primitive roots (w/ K. Agrawal) 2021
J. Number Theory 225, 360-373
121. Comparing multiplicative orders $\bmod p$, as $p$ varies (w/ M. Just)

New York J. Math. 27, 600-614
122. The number of non-cyclic Sylow subgroups of the multiplicative group modulo $n$
123. A quick route to unique factorization in quadratic orders (w/ N. Snyder)

Amer. Math. Monthly 128, 554-558
124. The distribution of numbers with many factorizations

Math. Z. 299, 2327-2339
125. Numbers which are orders only of cyclic groups

Proc. Amer. Math. Soc. 150, 515-524
126. Joint distribution in residue classes of polynomial-like multiplicative functions (w/ A. Singha Roy)
Acta Arith. 202, 89-104
127. The least degree of a CM point on a modular curve
(w/ P.L. Clark, T. Genao, and F. Saia)
J. London Math. Soc. 105, 825-883
128. Powerfree sums of proper divisors (w/ A. Singha Roy) 2022
Colloq. Math 168, 287-295
129. Dirichlet, Sierpiński, and Benford (w/ A. Singha Roy) 2022
J.Number Theory 239, 352-364
130. On the stable reduction of hyperelliptic curves (w/ C. Gong, Y. Gu, J. Lu)

Tohoku Math. J. 74, 195-213
131. A problem in comparative order theory (w/ S. Konyagin)

Period. Math. Hung. (to appear)
132. Distribution mod $p$ of Euler's totient and the sum of proper divisors
(w/ N. Lebowitz-Lockard and A. Singha Roy)
Michigan Math. J. (to appear)
133. Sums of proper divisors follow the Erdős-Kac law (w/ L. Troupe) 2022+

Proc. Amer. Math. Soc. (to appear)
134. On the greatest commnon divisor of a number and its sum of divisors
memorial volume for Eduard Wirsing (to appear)

## BOOKS

Not always buried deep: A second course in elementary number theory 2009
American Mathematical Society
A conversational introduction to algebraic number theory 2017
American Mathematical Society
Steps into analytic number theory (w/A. Singha Roy)
2021
Springer

## SERVICE ACTIVITIES

## Editorial positions

Associate Editor for the American Mathematical Monthly (2016 -).
Editor for the International Journal of Number Theory (2017-)
Editor for AMS Student Mathematical Library (2022-2026)
Editor for Integers journal (2022-)
Ross Mathematics Foundation
Board member (2018-). The Ross Mathematics Foundation oversees the Ross Program (both US and Asia variants): https://rossprogram.org/

## Refereeing

Have refereed for Acta Arith., Adv. Math., Algebra Number Theory, Amer. Math. Monthly, Bol. Soc. Mat. Mexicana, Bull. Aust. Math. Soc., Bull. Brazilian Math. Soc., Bull. Korean Math. Soc., Canad. Math. Bull., Canad. J. Math., Exp. Math., Integers, Int. J. Number Theory, Int. Math. Res. Notices, J. Integer Sequences, J. Logical and Algebraic Methods in Programming, J. Number Theory, J. Combinatorics and Number Theory, Math. Ann., Math. Comp., Mathematika, Res. Number Theory, Statist. Probab. Lett., and the Handbook of Finite Fields.
Have refereed grant proposals for the National Security Administration. Served on National Science Foundation grant panels in 2015, 2017, and 2020.

## Special session organizer

Co-organized (with L. Goldmakher, M. Milinovich, J. Kish) a special session at the 2012 AMS/MAA Joint Meetings titled "New perspectives on multiplicative number theory." This was a special session following up on an NSF-sponsored Mathematics Research Communities workshop ("The pretentious view of analytic number theory").

For the 2014 Joint Meetings, co-organized (with C. Pomerance) an MAA Invited Paper Session titled "The continuing influence of Paul Erdős in number theory".
Organized the special session "Elementary methods in analytic number theory" at the Spring 2015 Southeastern AMS Sectional Meeting in Huntsville, AL (March 27-29, 2015).
Organized (with R. Lemke Oliver and F. Thorne) a special session for the 2017 AMS/MAA Joint Meetings titled "Analytic number theory and arithmetic" (January 7, 2017).

## Work with junior mathematicians

Served on a Young Mathematicians' Network panel at the 2016 AMS/MAA Joint Meetings. The subject was "Finding a thesis topic and advisor." Co-panelist with Allison Henrich of Seattle University.

Since 2001, the University of Georgia has organized a high school math tournament for students in Georgia and neighboring state. I served as one of the primary contest organizers from 20212022. In addition, in the summers of 2013 , 2014, and 2016 , I was a faculty mentor for the week-long UGA MathCamp organized by Angela Gibney and Danny Krashen.
Was one of 11 speakers at the 60th anniversary Ross Program reunion conference in June 2017. The Ross Program is a residential summer camp where high school students are immersed in the process of mathematical discovery for six weeks.

Co-ran the Ross Mathematics Asia Program in Huangshan City, Anhui, China, in Summer 2018 (jointly with Enrique Treviño, Lake Forest College). Taught Advanced Courses at the 2019 Ross Asia Program (Zhenjiang, Jiangsu, China) and the 2020 and 2021 Ross Programs (online). Co-taught the program in 2022 (in-person).

## Teaching in developing countries

Taught a one-week course in Manila in July, 2013 for a summer school on algebraic curves. The summer school was sponsored by CIMPA (International Centre for Pure and Applied Mathematics) and ICTP (the Abdus Salam International Centre for Theoretical Physics); both of these are organizations aiming to promote scientific education in the developing world.
In Summer 2017 and Summer 2019, taught minicourses in number theory at the Universidad Autonoma de Santo Domingo (UASD), in the Dominican Republic. The courses introduced students and local faculty to central topics in elementary and analytic number theory. This was part of an effort to recruit and train prospective mathematics PhD students. Taught a graduate course to Dominican mathematics PhD students in Winter 2021 (online).

## MENTORING

Postdoctoral mentor
Lola Thompson (2012-2013)
Joseph Vandehey (2013-2016)
Joshua Stucky (2022-)

## Thesis supervisor

Emily Jennings (M.A., 2014)
Lee Troupe (Ph.D., Spring 2016)
Noah Lebowitz-Lockard (Ph.D., Spring 2019)
Kubra Benli (Ph.D., Spring 2020)
Matthew Just (Ph.D., Summer 2021)
Komal Agrawal (Ph.D., Spring 2022)
Patrick Akande (Ph.D., in progress)

## Undergraduate research supervisor (through UGA's Center for Undergraduate Research Opportunities)

Jackson Douglas Hopper (2015-2017); Jackson received a $\$ 1000$ CURO research assistantship in Spring 2015 and a $\$ 3000$ CURO summer fellowship in Summer 2015. Our work on "digitally delicate" primes appeared in the Journal of Number Theory (paper \#73 above).

## UGA TEACHING EXPERIENCE

MATH 2260: Calculus II for science and engineering
Fall 2012
MATH 3220: Advanced problem solving
Fall 2012
MATH 3100: Sequences and series
MATH 4400/6400: Elementary number theory
MATH 3220: Advanced problem solving
Spring 2013

MATH 8440: Advanced topics in elementary number theory
MATH 3100: Sequences and series
MATH 3220: Advanced problem solving
Spring 2013
Fall 2013
Fall 2013

MATH 4150: Complex variables
MATH 3100H: Sequences and series (Honors)
MATH 3220: Advanced problem solving
Spring 2014
Fall 2014
Fall 2014
Spring 2015
Fall 2015
MATH 4000: Modern algebra and geometry I
Fall 2015
Fall 2015
Spring 2016
Spring 2016
Spring 2016
Fall 2016
Fall 2016
Spring 2017
Spring 2017
Fall 2017
MATH 3100: Sequences and series
Fall 2017
MATH 3220: Advanced problem solving
Fall 2017
Fall 2017
Fall 2017
MATH 3220: Advanced problem solving
pring 2018
Fall 2018
Fall 2018
Spring 2019
Spring 2019
Spring 2020
Spring 2020
Fall 2020
MATH 3100: Sequences and series
MATH 3220: Advanced problem solving
Spring 2021

| MATH 8400: Algebraic number theory | Spring 2021 |
| :--- | ---: |
