

Addendum to Syllabus for MATH 1113

(As taught by Frank L. Churchman)

Grading: Ninety percent of your grade will be determined by computerized testing or homework as explained in the course information on the Math 1113 homepage at <http://www.math.uga.edu/~john/new1113>*. While there, I suggest that you download a hard copy of the course syllabus and keep it for your information. You will also find a link to download the JExam software at this site (see the address below). You only need to download this once on your home computers. However, you must download it each time you use it at the EITS labs at www.eits.uga.edu/sites.

There are two on-line homework assignments for each of the six computer tests. Only the best nine will be retained to compute your homework grade which will count 5% of your final average. After each homework assignment's due date I will give you an in-class quiz by selecting one or two problems at random from the on-line homework just completed. At the end of the semester, I will give one bonus homework assignment. I will also grade only the best nine of the in-class assignments for 10% of your final grade. I expect each student to keep an adequate supply of 3"X5" index cards on which to take the in-class quizzes. NO make-ups for the on-line homework or in-class assignments.

A percentage breakdown of your grade is given below.

| Computer tests | | | | | | | Computer | Class work |
|----------------|-----|-----|-----|-----|-----|----------|----------|------------------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7(final) | homework | (pencil & paper) |
| 10% | 10% | 10% | 10% | 10% | 10% | 25% | 5% | 10% |

The grading scale is: A ($X \geq 92$); A⁻ ($89 \leq X \leq 91$); B⁺ ($87 \leq X \leq 88$); B ($82 \leq X \leq 86$); B⁻ ($79 \leq X \leq 81$); C⁺ ($77 \leq X \leq 78$); C ($72 \leq X \leq 76$); C⁻ ($69 \leq X \leq 71$); D ($60 \leq X \leq 68$); F ($X < 60$). Note: X= your average at semester's end.

The lowest of test grades 1 through 6 will be replaced by your grade on the final if that is higher than your low test grade. If you are ill and miss a scheduled computer test, bring your documentation and I will see that you get to take a make-up. However, don't do this more than once.

There is a computer program that will be used for practice test problems. You may download this program to your computer from the math homepage at

[Http://www.math.uga.edu/1113/1113home.htm](http://www.math.uga.edu/1113/1113home.htm) (windows)

[Http://www.martin01.chem.uga.edu/~jmartin/jws](http://www.martin01.chem.uga.edu/~jmartin/jws) (MAC)

Attendance: Your attendance is important! For this reason, I will be passing a roll for you to initial each day. It is your responsibility to initial this roll. I reserve the right to administratively withdraw any student after (5) five absences. There are no excused absences.

Office: Barrow Hall room 215C (542-5287)

9:30am-12:00noon Tuesday and Thursday or by appointment.

Email: Use the email available through WebCT after you set up your account.

*You may also go to www.math.uga.edu, move your cursor to undergraduate information, click on course information, click on math 1113 and you are on the homepage for this course. There are 12 sites that involve information for this course. You are expected to have read all this information within one week from today. Also, expect a take-home quiz on this material due in one week. Good luck from the management.
