

Math 2200  
Dr. Will Kazez  
636 Boyd Graduate Studies  
will@math.uga.edu

The textbook for the course is *Calculus, Early Transcendentals Version, 7<sup>th</sup>* ed., by Edwards and Penney.

Homework: This is by far the most important part of the course. There is no way to learn Calculus without doing lots of homework problems. Homework will be done online at

[https://webwork.math.uga.edu/webwork2/MATH2200\\_Kazez/](https://webwork.math.uga.edu/webwork2/MATH2200_Kazez/)

I think you will find that the homework system is pretty intuitive and user friendly. For instance, you get full credit for a homework problem, no matter how many times you try it, as long as you eventually solve it correctly. I will send an e-mail message to your MyID@uga.edu account with instructions on how to log in. **If you have added the course recently, you may not receive an e-mail message from me. In this case you will need to e-mail me your student ID # (e.g. 810-12-3456), from your uga.edu account.**

Grading: There will be 3 midterm exams. They are scheduled for September 21, October 19, and November 16. The final exam will be from 12:00–3:00pm on Monday, December 10. The final will be held in our usual classroom. No make-up exams will be given. The final exam will be cumulative and will be worth two midterms. In addition the homework grade will count as one midterm.

Office hours: My office hours are on Wednesdays 10:00–10:50am and Thursdays 8:30–9:30am or by appointment. In addition the Math department runs Study Rooms Monday through Thursday during the late afternoon. I'll give you the exact hours as soon as the schedule is finalized.

Recitation: You will meet with a TA on Thursdays from 12:30–1:20pm. The main purpose of the recitations is to go over homework problems.

You will **not** be allowed to use calculators during exams. I like the idea of using a calculator to do problems that could not otherwise be done, but too many people have been using them to work out things they should already know. (Like  $\sin(\pi/2) - \ln(e) = ?$ ).

Withdrawal policy: If you withdraw from the course before the midpoint, I will assign you a grade of W.

The following Calculus help books were written by friends of mine. I don't know if they'll help you with the course or not, but you can take a look at them at the UGA Bookstore and/or at the online link, and decide for yourself.

*How to Ace Calculus: The Streetwise Guide* (\$14.95) by Colin Adams, Joel Hass, and Abigail Thompson.

*Calculus (College Review Series)* (\$13.95) by Elliot Gootman.

You can find reviews of these books at <http://www.maa.org/reviews/calcbks.html>
