

**MAT 1113
Summer 2003
Syllabus**

Instructor: Allison W. Arnold
Phone: 542-2645
Office: 328B Boyd GSRC
Email: allison@math.uga.edu
Office Hours: TBA.

Text: UGA edition of David Cohen's Precalculus.

Supplements: 1113 Tutorial Program (Install the tutorial program on your personal computer using the diskette OR access the tutorials from any UCNS lab site).

Course Objectives: The objective of this course is to study functions and their properties and graphs. Specifically highlighted are linear, quadratic, polynomial, exponential, logarithmic, and trigonometric functions.

Web Site: Access the MAT 1113 Department web site at <http://www.math.uga.edu/1113/1113home.htm> for up to date course information and the testing schedule. Please print the syllabus (test information) document found on this site.

Grading Scale:

Test 1:	5%
Tests 2-7:	60%
In class grade:	15%
Comprehensive final:	20%

The final exam score will substitute for the lowest score of tests 2-7. Tests 3-7 will each contain 2 questions from previously tested material. See the MAT 1113 Current Announcements posted on the 1113 home page before each test for the review topics.

Note that 90-100=A, 80-89=B, 70-79=C, 60-69=D, below 60=F.

Attendance: Mandatory! You are allowed only 3 absences throughout the semester. After the 3rd absence I have the right to withdraw you from the course with either a W or a WF (definite WF after midpoint). The only exceptions I will make will be in emergency situations. The Office of Student Affairs must document all such emergencies before I will allow any relaxation of the attendance policy. Bottom line: To do well in the course, don't miss class! However, if you decide you wish to make a personal withdrawal from the course, please complete the process yourself and notify me of your decision.

Miscellaneous: As a general rule, I do not accept late homework, nor do I give make-up quizzes and exams. Quizzes will be announced so there is no reason one should arbitrarily miss on quiz days. Keeping up with your in class grades makes a significant positive impact on your overall grade in the course.

Academic Dishonesty Policy: All students are responsible for maintaining the highest standards of honesty and integrity in every phase of their academic careers. The penalties for academic dishonesty are severe and ignorance is not an acceptable defense. Please read the Culture of Honesty disclosure found at http://www.uga.edu/ovpi/academic_honesty/culture_honesty.htm.
