The textbook for this course is Calculus with Analytical Geometry, Early Transcendentals Version, 6e, by Edwards & Penney. We will study limits, continuity, derivatives and their applications, the mean value theorem, curve sketching, and anti-derivatives. For an approximate course outline, visit the UGA calculus syllabus:

http://www.math.uga.edu/undergraduate/2200syllabus_outline.htm.

Testing/Grading: We will have 4 in-class tests – each one will be worth 14% of your grade. Homework and quizzes will be worth 14%. The comprehensive final exam will count for 30% of your grade.

I do **not** give make-up quizzes, but I will drop your lowest quiz grade. Calculators will **not** be allowed on quizzes or tests. Also, you will probably not receive much (if any) credit if you do not show your work or if I can't read what you turned in.

Attendance Policy: Students are allowed no more than 5 absences. After the fifth absence, I may withdraw you from the class. After March 1 this will result in a WF.

Academic Honesty: All students are responsible for maintaining the highest standards of honesty and integrity in every phase of their academic careers. The penalties for academic dishonesty are severe and ignorance is not an acceptable defense. For more information, visit www.uga.edu/ovpi/academic_honesty/culture_honesty.htm.
