10. Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:

Bergonio would always make sure we understood certain things before we began our lab and would always answer our questions effectively.

He always wanted to help you, and always had a positive outlook during class. Bergonio was a great teacher lab teacher.

He was helpful if you asked. He also gave step-by-step instructions during labs, that as a beginner in Maple, was particularly helpful.

He was very prepared for the classes. He was always open for any questions and it was obvious that he knew what he was talking about. He was also friendly and patient.

The assignments, tests and grading policy were perfect...not too hard and not too lenient. I felt the classes could have been more interesting though...at times it was boring.

very understanding when it comes to due dates; if the whole class was struggling he understood and pushed the date back or helped the class as a whole; overall pleasant to be around

Whenever we had assignments he was always there helping students that didn't understand a part of maple. He also made sure we were learning how to use maple by showing us how to plug in equations.
