awesome teacher, really knew a lot about calc

friendly, helpful, nice, knowledgeable

great instructor. i actually came to him when i had questions about my calculus class, and he explained it so i could understand.

He did a very good job in helping and assisting with this lab. I don't have any negative remarks for him in anyway.

He is always available and willing to help students and he explains it in simple terms that are easier to understand than my other math teacher.

He was a good teacher and could relate to the class.

He was a great teacher all around

He was extremely helpful whenever we had trouble with Maple. He also was enthusiastic during his classes.

He was very familiar with maple.

He was well prepared and always ready to answer questions. He was very patient and helped with the Maple projects.

I expected to dread this class, but Phil made all the difference. He's a great guy and an excellent teacher (I would have been thrilled to have him for my MATH 2200 lecture!) He was extremely helpful in reviewing concepts that we had learned in lecture, which I found to be the most useful part of the course. I would recommend him as a teacher to any of my friends.

I thought his grading system was fair and he was always well-prepared. Always willing to answer any questions.

I thought that Phil did a really good job on explaining the maple program and helping the students understand the code in order to make it work. Also, he was there if we needed individual consultation, and he was available to discuss the current math problems in our regular Caculus classes.

Our instructor was enthusiastic about our MATH 2200L section. He was always happy to answer our questions or address our concerns.

This guy was great he was really helpfull and he would stay after class to help people with their questions in math not just the lab. please give him more money and cars and pretty much whatever he askes for

Very well taught teacher to the class!
