Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:

He always explained cal in a way that was easy to understand.

He is a great teacher. He cared about the students and really wanted us to understand the material.

He is always willing to help his students in any way possible, and he treats us with respect and gives us opportunities to correct our mistakes.

He successfully covers all aspects of the chapters. There are no surprises on his tests which reflect good teaching.

His gradings extremely fair and hes a very personable teacher. His one drawback is he makes some small mathematical errors which at times make it difficult to understand problems.

I took Calculus over a year ago, but nothing ever made sense. In this class, I understand everything, the first time around.

Phillip has been second only to Mrs Warnes (with whom I took pre-calc in Spring 06) in the rating of quality math teachers I have had throughout my school days. He clearly explains the material and then gives supporting examples to illustrate. Phillip made himself more than available to all students by offering flexible office hours in addition to meeting by appointment. Also Phillip is a nice guy who makes class fun and interesting.

tests/quizzes/hw were all graded fairly with partial credit awarded for maximum effort...fair amount of assignments...and weekly quizzes helped in preparation for tests

Truthfully, i would say that my instructor was outstanding if he was more prepared for class. When he was explaining problems at times he would make mistakes which made it harder for me to understand. However, he was ALWAYS available for individual tutoring and that was a tremendous help. This instructor was one of the BEST math teachers i have ever had in my life despite my horrid distaste for math as a subject. i hope he teaches for a long time!
