always broke down the material for the students to understand. printed out worksheets and handouts

Calculus is very tough course, but the professor was able to dumb down the material. Very good teacher, but for me it was hard to keep up. All in all, he did his job as a professor.

class was run perfectly

Fair class. He was available to help with questions and was genuinely interested in helping. Great teacher! Went at a reasonable pace and explained concepts in detail

great prof

Great teacher, very fair and direct. Did not waste time, when we were in class we learned. Respected the students time to not screw around, so if we had nothing to do he'd let us out early. Break-out session was not as effective, but that was our TA and not Phil. Only times things got a little confusing was when Phil made small math errors, but he certainly knows his calc.

He is one of the best teachers at UGA. Math used to be my hardest subjects but he just has a way of making calculus easy to understand. A truly remarkable teacher.

He knows the material well and knows how to teach the material well to students. I do wish he would be a little more receptive to answering questions in reference to what the test is about. All in all though, he is a very good teacher.

he makes it easy to understand. Gives lots of examples that help explain the material. Tests are fair evaluations of what we have learned

hes a nice guy and a good professor but he explains the material SO fast! when you ask a question for clarification on the problem he explains it too fast again and you are still confused.

He was a good teacher and his grading was reasonable.

I enjoyed this class. I thought he taught very well and was very clear on what to expect on tests. The only problem was the TA that we had on our Monday breakouts. He was not that helpful at all.

I greatly enjoyed going to math class with Mr. Bergonio. He made class fun and interesting and was always there for help if anyone had questions. Phil was a great teacher and taught the material in a way that helped me learn and have interest in the subject.

I liked how we did a lot of example problems during the class. He was very fair on grading, and always turned back our assignments on time.

i've never taken calculus before and phil was a pretty good teacher. he didnt mess around so i knew he meant business, yet i found him quite approachable when i had a question. he taught everything thoroughly and he didn't give us surprises on the test (things that he hadn't even taught. some teachers do that....). on the other hand, nham can't speak english and didn't help any of us whatsoever. breakout was a waste of my time.

one of the best teachers i have had at uga extremely helpful. always available for office hours and tutoring
