<p>Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:</p>
<p>all the assignments and quizzes and tests were difficult enough, yet not too difficult to think and work through</p>
<p>Bergonio was definitely one of the two best math teachers I have ever had. He may just teach the way that I learn best, but I was involved and interested in the class and the material because of his ways of teaching. Him, and Mr. Segars, also of the UGA math department, have been the best math teachers I have ever had.</p>
<p>he directs more focus on application of all the material than solving confusing problems.</p>
<p>I can tell that he is VERY excited about the subject material and that he wants us to be just as excited. He is a really nice person, and cares about us as people not just students.</p>
<p>Phil Bergonio was a really good teacher. He made the class as fun as calculus can be. He was extremely straightforward on what was going to be on the test. His grading was extremely fair, and he would make notes on the side. Phil was always open to answer questions before a test or quiz. He was enthusiastic, and tried to help all of his students. I have no criticism.</p>
<p>phil made learning calculus much easier than i had expected it to be</p>
