Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:

Did the best job he could teaching such a bland subject over such a short period of time. Overall a great guy, a man, and a champion.

Good, competent Calculus teacher. Very helpful. The only complaint I would have is he moved a bit fast.

Good job of covering a lot of material over a shortened summer session without making it overwhelming. Also, grading was very fair (with bonus pts, etc).

good teacher, made material very understandable.

Great teacher. Extremely fair and makes the material easy to understand.

He explains the material well and if you dnt get it then he will work with u outside of class time... he make it understood what needs to be done to pass the class.

He is a really nice and helpful guy.

He taught the material very well and made it so that I understood better. Some of the tests were harder than he made them seem when we talked about them but overall he was a great teacher.

He was very easy to talk to and answered all of our questions. He stayed after alot to talk to us if we needed extra help.

He was very fair with grading, especially with partial credit. However, I felt intimidated to ask questions at times because my questions weren't valid enough.

One of my best grad student taught classes. Although the topic was fairly easy, he did well to explain it to the entire class, and did the best possible to see that all understood.

Particularly good at organizing material into concise worksheets and study aids. I liked the idea of the homework presentations. Testing seemed very fair in the material covered. Overall an exceptional teacher.

Phil is an extremely smart teacher.. He can do this stuff in his head so quick and sho fast..lol

I learned a lot in theis class.

Phil is very down to earth and makes it so class isn't unbearable!

Phil was very helpful at answering specific questions and excellent at helping the whole class understand the concepts we were leaning.

Professor Bergonio's teaching style was very effective. He would always hand out printed worksheets to the class of the outline of the day's notes; these were useful along with the many examples and thorough explanations that he gave. Not only did he explain how to use certain properties and theorems, he also gave many proofs to demonstrate why they work and can be used. His tests were reasonable, and his grading scale was excellent. I would highly recommend his class to anyone taking the calculus course.

Really amazing teacher, it was a short course and almost everything was taught fully, a little material at the end got rushed but besides that really amazing teacher!!

The teacher was always avaiable to help students after class. He taught the concepts until everyone in the class understood.

this classs was very well organized and informative. Even though I am not a mathematics major the professor made this subject some what interesting which made taking this course easier than it could have been
