<p>Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:</p>
<p>I liked this class, however i wish there were more time spent on review and helping students on the questions they didnt understand. but overall, hes a great teacher. I also wish Webassign wasn't used! ugh</p>
<p>I like how Mr. Bergonio made the material easy and fun to learn. Overall a great class</p>
<p>I think that he is absolutely intellgent. He is also a very good teacher who really captivates the students with his charming personality. I think that the only thing that he may need to work on is his confidence. He is so smart but when he looses his confidence in his work, it makes the students wonder whether he knows what he is doing. i knwo that he will be an awesome teacher!!</p>
<p>I wish there was a way of knowing my grade in the class. I really feel like I am guessing</p>
<p>Phil is very helpful. Anytime that I had questions during class or outside of class, he would always answer them and help me to understand the material. The class moves at a quick pace and often leaves people with questions. Webassign does not help with learning math at all and does not reflect the knowledge that we gain from the course. For example, if you learn something and then enter it incorrectly into the computer, you will get it wrong even though you understand the material.</p>
<p>This instructor was very helpful. I enjoyed his class and his teaching methods were clear. He gave good examples that were helpful on the tests. He always explained why and how equations worked. The grading in his class was fair. I do not have any criticisms for him.</p>
<p>very willing to help students individually</p>
