

Finding 10% and 5%

To find 10% of a number, divide the number by 10 by moving each digit one place to the right.

$$\$85 \div 10 = \$8.50$$

the 8 moved from the tens place to the ones place
the 5 moved from the ones place to the tenths place

so 10% of \$85 is \$8.50.

5% is half of 10%, so to find 5% of a number, first find 10%, then divide by 2.

10% of \$85 is \$8.50, so 5% of \$85 is half of \$8.50, which is \$4.25.

- 1) Find 10% of \$60 and find 5% of \$60.

- 2) Find 10% of \$46 and find 5% of \$46.

- 3) Find 10% of \$82, answer: _____

and find 5% of \$82, answer: _____
