

## Estimating circumference

- 1) Use a paperclip and a loop of string to draw 2 circles.  
Draw and measure the radius of one of your circles.  
Draw and measure the diameter of the other circle.

- 2) Fill in the table below. Use 3.14 for pi. Then use your table to estimate the circumferences of the circles you drew above.

radius:									
diameter:	1 cm	2 cm	3 cm	4 cm	5 cm	6 cm	7 cm	8 cm	9 cm
circumference:									

Approximate circumference of your first circle: \_\_\_\_\_

Approximate circumference of your second circle: \_\_\_\_\_
