

We can also use number lines to help us relate fractions and decimals.

3) Fill the boxes with the fractions that belong there.

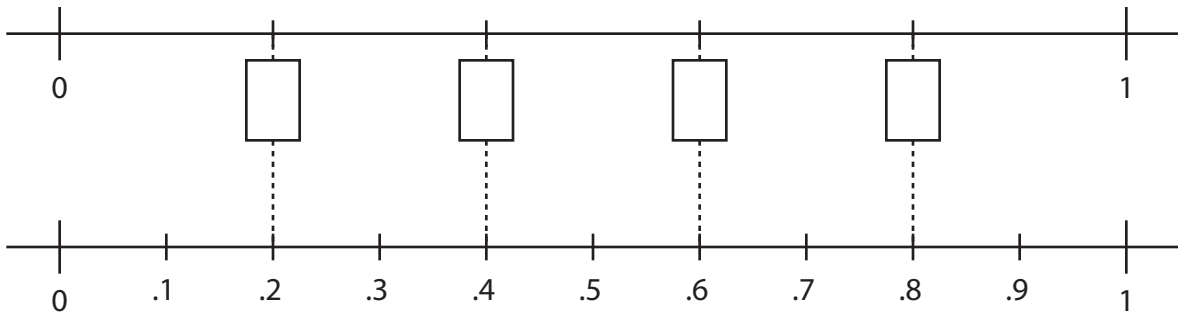

Use the number lines to write the fractions on the first number line as decimals:

=        =        =

---

4) Fill the boxes with the fractions that belong there.

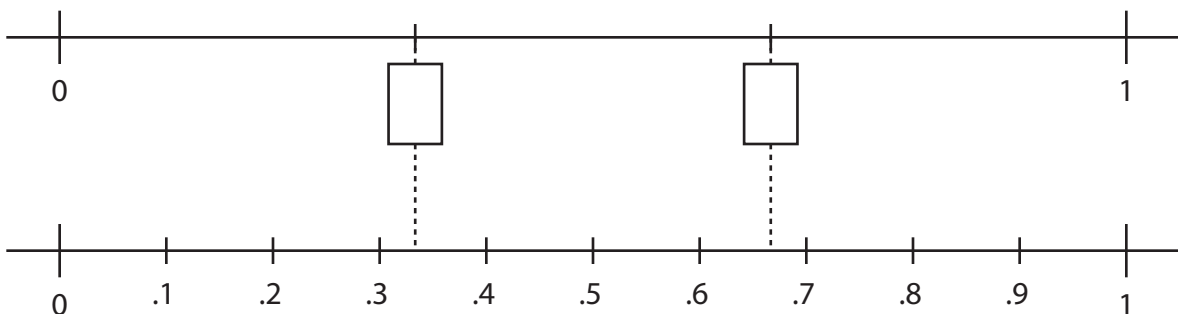

Use the number lines to write the fractions on the first number line as decimals:

=        =        =        =

---

5) Fill the boxes with the fractions that belong there.

Use the number lines to write the fractions on the first number line as decimals, approximately:

=        =
